

McGorman
PVC Windows & Doors

**Manufacturers and Installers
of Quality uPVC Windows & Doors**

McGorman PVC Windows & Doors was founded in 1995. We have been in the industry since the 60's having worked for a well-known joinery works for 30 years. Based in Smithboro, Co.Monaghan, we employ local people to provide a personalized service for our customers.

Since 1995 the company has built up an excellent reputation in manufacturing, supplying and installing quality windows & doors with a focus on a personal attention to quality and delivery of services to our customers.

McGorman Windows offer a choice of many window and door designs from Tilt and Turn, Sliding Sash, and Conventional Casement windows with a wide variety of colours and glass design options.

Our Windows & Doors are manufactured in our workshop by our skilled staff with a continuous focus on producing the finest products possible. Our top quality products are manufactured using KBE German profile and the glass is supplied by Vista Therm and Douglas Glassworks.

Why choose PVC and why choose McGorman Windows?

- **Excellence**
McGorman Windows strive for excellence and quality in everything we do from material selection to manufacture and installation. Their PVC windows & doors offer the highest level of security, a reduction in outside noise and virtually no maintenance for years to come.
- **Not all PVC Windows are the same**
The truth is not all PVC windows are the same. Some are made from higher specification materials for higher quality, longer lasting performance. Also not all window companies are the same, some supply and fit windows made by large manufacturing companies and others as is the case with McGorman Windows who manufacture the windows themselves locally in our own workshop.
- **PVC is the best and most fit-for-purpose materials for windows and doors**
Due to its unique properties, PVC is widely recognized as one of the best and most fit-for-purpose materials for windows & doors. PVC windows are amongst the most rigorously tested and approved of all window and door products and the KBE range of PVC has achieved the independent quality standards and accreditations of IAB & BBA.
- **Warmth & Peace of Mind**
PVC Windows & Doors are second to none at keeping out cold , draughts, damp & noise plus they'll also help keep out intruders. They are the perfect replacement for old timber frames, or inferior quality aluminum windows. They bring style and quality to your residence.
- **Low Maintenance**
uPVC is a remarkably low maintenance material, it will easily withstand the rigours of the Irish climate there will be no flaking, no fading, no rusting and no rotting. All that's needed is an occasional wipe with a damp cloth, and you only need to lubricate the locks, handles and hinges annually.
- **Tailor made for your needs.**
To ensure the total absence of draughts or leaks, all our uPVC casement windows are made to measure to your exact specifications to ensure a perfect fit. We will visit your home and listen carefully to your needs and requirements and you can tell us exactly what you want. What's more, all our windows come with a full 10 year guarantee on materials and workmanship

window styles

Style & Colours

Select the style and color to complement your home. Opening styles and window shapes can be manufactured to your own style and needs from traditional casements, tilt and turns to vertically sliding sash. You can choose from a range of colours to suit your individual taste.

PVC windows will improve the energy efficiency of your entire home. They will lower your fuel bills and can drastically cut the amount of warm air leaving the room.

bringing space and luxury to everyday living**

safety & security

When installing new windows and doors, security is probably the single most important factor. McGorman Windows KBE system accommodates multi-point locking systems that help safeguard your property and personal possessions from possible break-ins.

All Windows and Doors are steel reinforced to the highest specifications and requirements. A multi-point locking mechanism with central deadlocks is used in all doors.

Safety glass is used as standard in all Doors and large glazed areas, as well as in any windows that are closer than 800mm from the finish floor.

All windows and doors are internally glazed to add that extra security.

Tilt & Turn Windows

Tilt & Turn windows in the turn position provide a large unrestricted opening for use as an emergency exit in case of fire. The tilt inward position offers ventilation. The tilt occurs before the turn leaving it safe for children in their bedroom.

energy

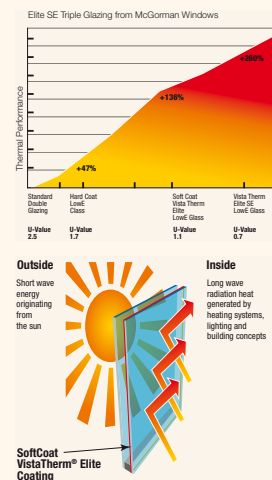

PVC windows will improve the energy efficiency of your entire home! They will lower your fuel bills and can drastically cut the amount of warm air leaving the room.

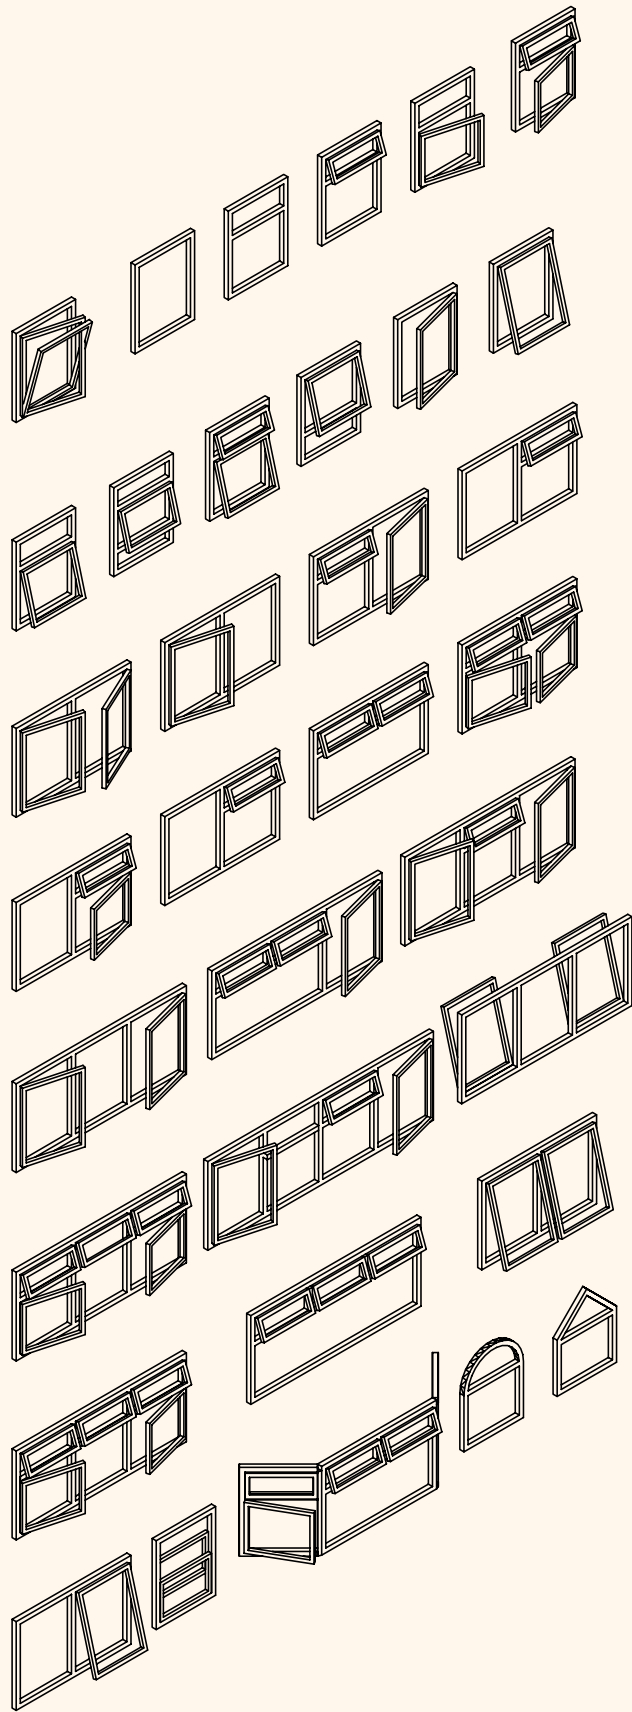

U-Values A U Value is a measure of the rate of heat loss through a window. The lower the U-Value the higher the thermal efficiency of the window. The U-Value of a McGorman Window manufactured with KBE profile and using Low Iron Vista Therm Elite (Diamant) with Super Warm Spacer bar is U Value = 1.4 and G - Value = 0.43.

VistaTherm Elite® – Low Iron Glass The latest innovation in insulated glass: Greater comfort and lower energy costs for your home High performance insulating glass up to 136% better than standard double glazing. This is achieved through eliminating heat loss during cool months, thus helping to cut energy bills and making your home more comfortable

Thermal efficiency for your home

- eliminate heat loss during cool months
- eliminate heat gain during warm months
- help cut your energy costs/fuel bills
- make your home more comfortable
- eliminate uncomfortable cold spots close to window
